HENDERSONVILLE, N.C.

PREFACE

IN submitting Volume I of the Hendersonville City Directory, wish to offer an apology for any names or valuable information that has been overlooked. This book being the first of its kind for the town, it has proven to be no little task, but it is safe to say the next one will be easier to compile and corrections and additions can be given careful attention.

The observing eye has had the pleasure of seeing quite a few new buildings going up, and extensive repairs being made in Hendersonville and its suburbs within the past six months; considerable effort is being put forth by those in authority as well as by its citizens to so arrange and manage the affairs of the town to the comfort and best advantage of strangers, and all, coming into their midst.

With the excellent opportunity for the study of nature with so many of her resources; with the delightful climatic conditions as well as access to numerous springs with their pure, refreshing crystal waters Hendersonville is unequalled as an educational center, a fact evidenced by its number of well equipped schools, advertisements of some of its colleges will be found elsewhere in this book.

Hendersonville's location upon a broad level tableland around which winds the Ocklawaha; its railroad facilities and the eagerness of the officials of this means of transportation, to be co-operative for the good of the town and surrounding country makes it a very desirable spot for the locating of manufacturing plants, whose payrolls would add much as an attraction to bring people here to buy land, build homes and help make it a stronger all-the-year-round town as well as a better resort town. There are thousands of opportunities here awaiting the man to develop them.

In conclusion I want to thank the patrons of this book and the public in general for its courteous treatment.

IDA ELIZABETH MAXWELL.

BEFORE THE WINTER IS OVER

you will learn that the best domestic coal is the cheapest in the end. We handle the genuine Jellico Block. We hand-fork all the dust and slack out of it, and put two thousand honest pounds into every ton that leaves our yards. It really is not economy to buy dust and slate, even at a low price.

What Time Is It ?

Everyone asks this question many times daily. We are all dependent upon the time. Our lives are regulated by our watches. The lack of a watch is a big handicap to both men and women.

Therefore, why try to get along without one? Let me show you a good watch; one you can depend upon. We can suit both your taste and your pocketbook. See

Take My Advice

and go to W. H. HAWKINS & SON if you need glasses. I never knew what eyeglass comfort was until a month ago—if the lenses were right there was always something the matter with the nosepiece; it either pinched or was everlastingly falling off.

"But a friend suggested that I try HAWKINS & SON, and, after some persuasion, I went down to their store at 413 N. Main St., just across from the City Hall. I'll never be sorry. They fitted me with a pair of those new invisible bifocal lenses that look just like ordinary glasses. I can use them to read or sew or to wear on the street and they are so comfortable I often forget that I am wearing glasses at all."

GOOD PLUMBING

IS AN ECONOMICAL INVESTMENT

BY GOOD AUTHORITY—It is proven that what you save in health, strength and servant hire will in a few months pay for an up-to-date system.

GOOD PLUMBING—Consists of a group of substantial and artistic fixtures, such as Bath Tubs, Lavatories, Closets, Sinks, Pipes, Valves, etc., arranged in a practical manner as to be perfectly sanitary and easy of operation, so that by a simple twist of the wrist cold or hot water is furnished as desired for various uses that are needless to enumerate here.

WE CAN FURNISH—And install for you a good and satisfactory Plumbing System at an exceedingly low price on terms that are very reasonable. We would like very much to talk this matter over with you. Just say the word and we will get on the job and give you a complete estimate without cost or obligation on your part, telling to the very cent what the amount of installation will be.

SYSTEM OF NUMBERING STREETS

This map, made from an actual survey, shows the Court House to be the center, thus making the distance to the City Limits one mile in all directions.

Main and all streets parallel with it run North and South, that part South of the Court House and First Avenue known as South Main, North of the Court House and First Avenue, North Main, etc.

All Avenues run East and West, crossing Main, and are known as North Avenue East or North Avenue West; South Avenue East or South Avenue West, as the case may be.

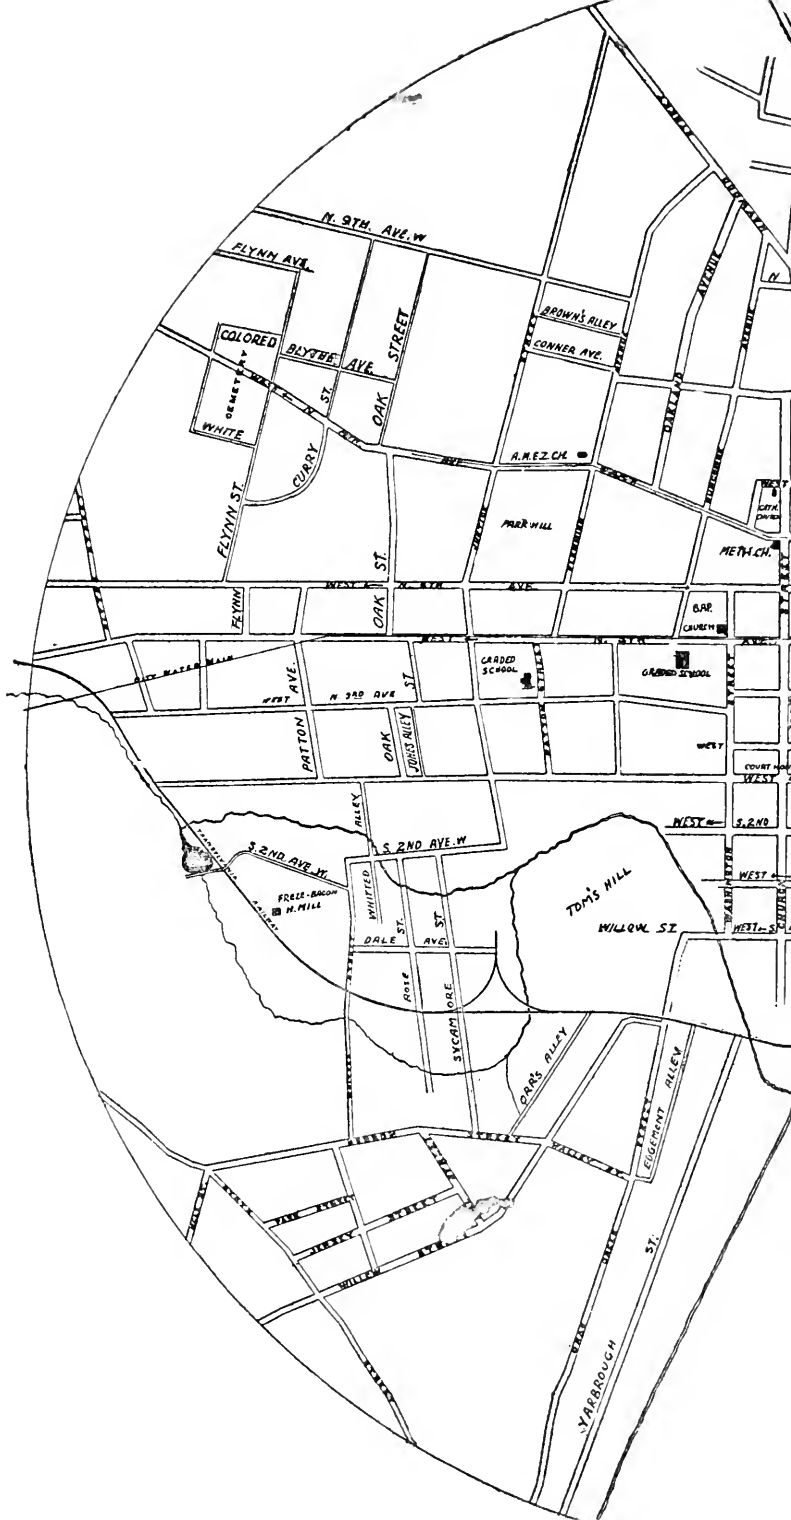

Since First Avenue and Main Street is the point upon which the town bases its Numbering System, one can readily see the number of the block in which they live.

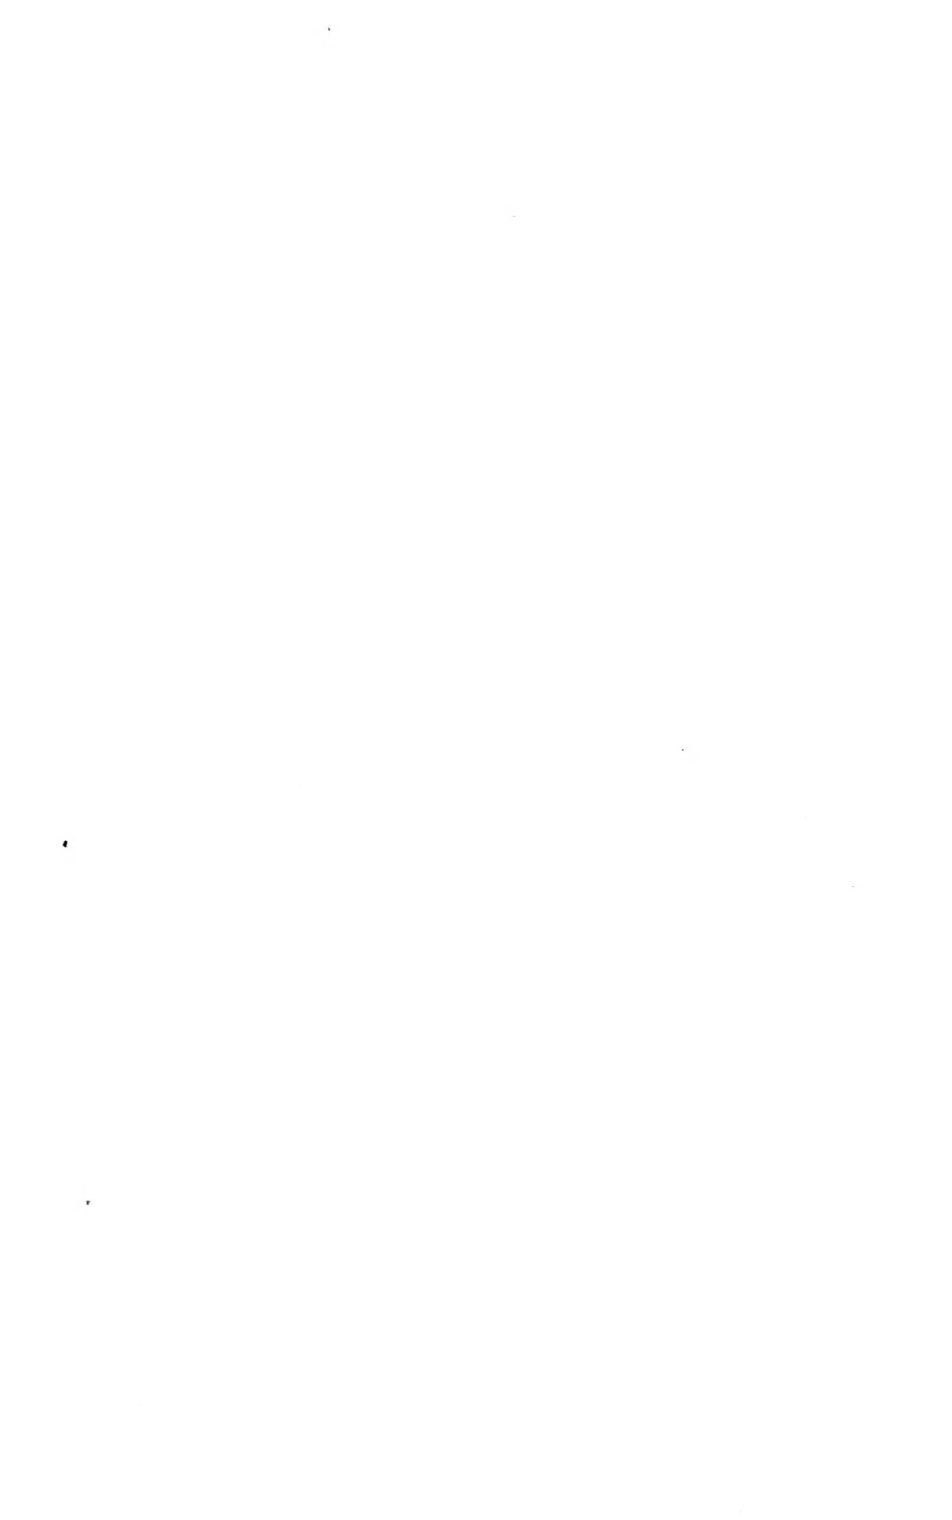

The numbering of the Avenues begins at the Court House, going as high as Ninth Avenue.

The blocks on the cross streets are regulated by the number of the Avenue South of them. For instance, if you are located in the block between Third and Fourth Avenue you are in the 300 Block, between Fourth and Fifth Avenue you are in the 400 block. The blocks on the Avenues begin their numbering at Main Street.

All numbers on the houses on the right-hand side of the Avenue or street as you go from the point of numbering should be EVEN numbers, and all on the left-hand ODD numbers.

HISTORY SINCE 1841

The year 1838 marks the beginning of our present county of Henderson. After the surveying and fixing of its boundaries, the next important step was to decide upon the proper location for its new Court House. As there were two places uppermost in the minds of the people it was necessary to leave the matter to a vote of the populace, therefore, in the year 1841 the General Assembly of the State of North Carolina passed an act providing that an election be held at each of the precincts in the county on the last Thursday in January—the Sheriff of the County to widely advertise the same ten days prior—the Sheriff to also appoint two Judges for each election precinct, the one to be taken from the Eastern and the other from the Western section of the County who were duly sworn to conduct the election fairly and according to the manner which elections were held in the State at that time.

In this election each citizen of Henderson County qualified to vote for Members of the House of Commons were allowed to put in one ballot, or a piece of paper, describing the place desired by him, thus making it possible for the Judges of said election and the Sheriff of the County to ascertain with certainty the location really desired. After comparison of the returns from each precinct, the Sheriff together with two Commissioners selected by him pronounced the point having the greatest number of votes. It was decided that if the point thus selected was nearer to the Buncombe Turnpike Road (now our Main business street) in Henderson, than to the French Broad River, the place where Horse Shoe is now located, George Allen, Andrew Maxwell, Jr., David Rees, John Davis and James Spann were to be appointed as Commissioners for the purpose of procuring by donation or purchase, not less than fifty acres of land including the point designated, or within one mile thereof, said land to be conveyed to the Chairman of the County Court

of Henderson, and his successors in office, for the use of said county, upon which land a town to be called Hendersonville was to be laid off by the Commissioners or a majority of them.

It was the duty of these Commissioners after advertising for thirty days, and having laid off the lots on said land, to sell the whole or such portion of them, as they deemed most conducive to the interest of the County, upon a credit of one and two years, the said Chairman of the Court making title whenever the purchase money shall have been paid, reserving such lots as were necessary for the erection of the public buildings, and the money thus raised to be disposed of by a majority of the Justices of Henderson County for public purposes.

Thus we have the starting of the town of Hendersonville.

It will be interesting to note the names of those, today connected with the affairs of the town and county, who are descendants of those good men, the Commissioners, who assumed the burden of the planning and laying out of our present Hendersonville.

George Allen leaves behind him, to help carry on the good work started in 1841, his Great Grandson, Jas. E. Shipman, Attorney, and member of the Law Firm of Smith, Shipman & Bridges.

Andrew Maxwell, Jr., is today represented by his son, Jonathan Maxwell, who is now quite an old man, but one who is blessed with an excellent memory and can make the hours pass away rapidly at his very old home, about three miles east of here on the Blue Ridge Road, Rural Route No. 1, with stories of the doings of the people of this section as far-back as the days of the Whipping Post. His son, John Albert Maxwell, is at present filling the office of Chairman of the Board of County Commissioners for Henderson County.

Jas. Spann has contributed to Spartanburg and vicinity the Honorable Major Spann, with his excellent family. Miss Minnie Spann, teacher in the Asheville Graded School, is a granddaughter.

John Davis leaves a granddaughter, Mrs. J. M. Waldrop, 1011 North Fifth Avenue, West, this city, the members of whose family are actively engaged in the affairs of the town today.

There are, perhaps, many others whom I could mention, but space and time at this compilation will not permit.
